Bipolar military ICs:

We still make 'em like they used to.

When you must have older bipolar military ICs, remember Lansdale. We serve the semiconductor aftermarket. Our products are those that others no longer make, assuring you that you'll always have a source.

You'll see many old friends on our product list, like Intel's 8080A and support products, Signetics' DTL and TTL, Motorola's SUHL-TTL and others. We can meet all your needs, even to the most exacting military standards, including MIL-STD-883.

We also do custom manufacturing, including Schottky, TTL, linear and digital.

So don't go to the expense of designing in a new part...not when we still make 'em.

Exactly like they used to.

For further information contact

ALTERNATE SOURCE DIRECTORY

The Alternate Source Directory is an industry-wide ross reference of devices that manufacturers claim are unctional equivalents to IC's made by other firms.

The second column of this Alternate Source Directory shows devices that are replacements for hose in the first column. Devices listed in **BOLD FACE** type have technical data in the Master Selection Guides. This information begins on the page listed to he right of the **BOLD FACE** part numbers. Products preceded by a ◆ have been discontinued by the manuacturer. This section does include discontinued devices hat are not listed in the Master Selection Guides; in order to maintain this list within some reasonable bounds, the A and B suffixes indicating improved verions generally have been dropped.

One of the difficulties with any cross reference is hat devices meant to be alternates do not necessarily perform the same in all circuits. Thus, it will be necesary for you to check specifications, or even check ciruit performance before deciding which alternates are ight for you. But if you do not find the devices you eed here, it may be possible to find additional alterates by locating the device in the Master Selection Guides. Particularly for digital circuits, the other prodcts grouped with it will normally offer similar or idenical performance.

The Alternate Source Directory is also available on floppy disk or compact disk.

ICMASD (IC Master Alternate Source Directory) is the MS DOS PC-based version of the directory on floppy disk.

1994
IC MASTER
CD-ROM PLUS

CD-ROM PLUS is the entire IC Master, including the complete Alternate Source Directory, on a single compact disk.

For more information about IC Master "Data on Disk" contact your local IC Master distributor or call Hearst Business Publishing direct at 516-227-1300.

scontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

ontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

scontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

ontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

ntinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

scontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

scontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

scontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

scontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

ontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.

Performance details often differ, so compare the specifications considering your requirements.

(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

iscontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

			(Continued)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

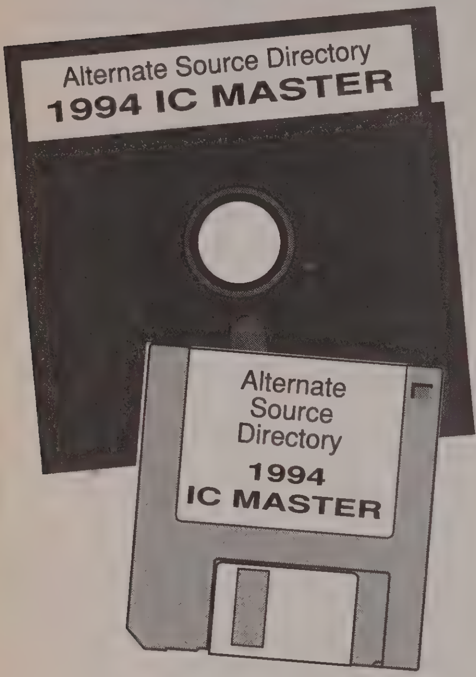
Hearst Engineering Software

ICMASD

ALTERNATE SOURCE DIRECTORY



The all new 1994 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1994 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all integrated circuits known to have a realistic replacement or alternative. The 1994 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient... and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1994 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing
645 Stewart Avenue
Garden City, NY 11530
(516) 227-1300 • FAX (516) 227-1453

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per ICMASD.

IC MASTER *CD-ROM PLUS*

1994
IC MASTER
CD-ROM PLUS™
ROMWARE
COMPACT disc DATA STORAGE
9660
Includes the complete 1994 IC Master *plus* the 1994 Directory of IC Data Pages *plus* the enhanced 1994 Alternate Source Directory *plus* a powerful inquiry generation and tracking system.

Considerable effort has been made to ensure the accuracy of the information presented herein. The Publisher assumes no responsibility for inaccuracies, omissions, manufacturers' claims or representations.
MANUFACTURED IN USA BY NIMBUS

3 reference sources on a single compact disk! **CD-ROM PLUS** is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. **CD-ROM PLUS** also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- **You can find the exact IC you need in seconds...**
- **Compare specs on your screen...**
- **Print the search results directly to your computer or printer!**

PLUS...

- **You can access over 1,100 manufacturer's data sheets and send them to your laser printer.**

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

JOIN THE CD-ROM BANDWAGON.

IC MASTER
BELONGS
ON YOUR BOOKSHELF

If you don't have your own IC MASTER, you can obtain your own copy by ordering now. Write for your own copy or order by telephone as described below, or contact your local IC MASTER distributor.

IC MASTER is a three-volume set of technical data carefully organized to direct you to the integrated circuits and related products that are closest to your specific needs. It is the surest and fastest way to find the optimum devices to answer an engineering design requirement. By ordering now, you won't have to borrow or search for IC MASTER the next time you need it.

Its Easy to Order:

You can order the 1994 IC MASTER simply by charging it to your Visa or Master Card credit card. To place your order call now: **TOLL FREE: 1-800-833-7138** Or mail your purchase order and check for $180.00* plus sales tax to:

Theirs

- 🔒 Virtually unlimited capacity.
- 🔒 32 layer definitions.
- 🔒 16 routing layers.
- 🔒 Assignable Power and Ground layers.
- 🔒 Copper pour for copper zones.
- 🔒 All object, on line editing. (Point and edit.) (Apply edit uniquely, locally, or globally.)
- 🔒 Compound pad stacks with full rotation.
- 🔒 Ability to import sections of existing boards for new design.
- 🔒 Automatic footprint generators.
- 🔒 Delete and undelete for all objects in the data base.
- 🔒 Over 1,000 footprints. (All SMT Manual footprints.)
- 🔒 Ability to create multipackage interconnected modules.
- 🔒 Full dimensioning capability.
- 🔒 All angle on or off grid manual routing with visual copper spacing.
- 🔒 Arcs and circles for traces and outlines.
- 🔒 Move, drag and place with 0.01 degree rotation resolution.
- 🔒 Full support for release to manufacturing.
- 🔒 **High quality autorouter, 16 layers simultaneously.**

To deliver the most innovative wireless communication ICs, we have to live up to everybody's standards.

With the growing demand for wireless communication products, you need an IC supplier with devices that know no boundaries.

That's exactly what you get with our wireless communcation ICs. They are leading-edge, highly integrated devices that make it easy for you to design smaller, higher performance products.

It's possible because our ICs are designed to meet all the key standards of the world, including the standard of *excellence.*

Which is why designers from all parts of the world choose us. They benefit from our years of experience delivering innovative ICs for voice and data communications.

These ICs include both analog and digital solutions in our powerful bipolar and QUBiC BiCMOS processes. Plus low-voltage, low-power RF and baseband ICs so your designs run longer on fewer batteries.

And we offer one of the world's smallest packages – our SSOP (Shrink Small Outline Package). With it you can design products that are more portable than ever.

So before you map out your next wireless design, be sure to include the highest standard in integrated circuits.

Then you'll see why we have a world of innovative ICs on hand for your wireless designs.
